<p>From a personal perspective, the proposed one way system will directly affect me, as a GP. I leave for work at school time, so add in 110 homes and make the system one way- the already congested roads will be impassable, there will be accidents, it will increase the risk for for pedestrians and cyclists. My neighbours are predominantly retired, and the increase in noise and traffic will negatively affect them. The school and GP practice here are at capacity. There is no provision made for increasing numbers of people using the same amount of services in the village. An already stretched system will be overloaded and collapse.</p> <p>The biggest factor in relocating to this area was the beauty and peace of the surrounding land. This is a green belt area, and possibly one of the few remaining ones in the area as housing developers have built on most of the others. The landscape and woodland are valued and necessary, and it is not the place of a developer to decide it is merely grey belt.</p> <p>Please consider the level of disruption and discord that will be created for the sake of more housing. Please value and respect the views of those of us who live here already, and want to continue to do so without such damaging change to a peaceful village.</p>
