<p>To build a significant number of houses on what is most definitely green belt would have a significant negative impact on Shepley. We already have a high percentage of new houses 52 already built off Abbey road with a possible further 100. This together with 8 on Marsh lane will increase the traffic significantly on an already busy Road. The area is becoming more congested already and getting out of roads on to Abbey Road is full of hazards and is dangerous.</p> <p>To have access through the estates to the proposed site will increase the risk of accidents to children who will be going to school.</p> <p>The services for Health care at the Health centre are already pushed to the limit so introducing more house will take it to breaking point.</p> <p>Schools are full, so how can we allow more residents to a place that cannot accommodate.</p> <p>There will be a dilution of how effective broadband will be with so many more homes proposed to be built.</p> <p>The building of these houses on green fields that provide water supply to Shepley springs could seriously impact the business and jeopardise the workforce, potentially leading to job losses.</p> <p>The idea of building these homes on green belt is in conclusion nothing more than an opportunity for developers to line their own pockets. Destroying a location through over populating beyond its infrastructure. Leading to a real decline in health and quality of life.</p>
