<p>The land outlined for this development is not suitable for the scale proposed. The development will increase the number of properties with cars that will all have to travel through an established estate to gain access. 100 houses will likely mean 200 cars or vehicles. Shepley as it is can not sustain this amount of development. The facilities within the village such as the doctors and school are not suitable to cope with this huge increase especially given the fact that a current housing development is still on going less than 1/4 mile away from this proposal. The environmental impact on Shepley is becoming huge. Within the last few years we have seen infill of housing developments, Abbey Road and Marsh Lane for example. All of these developments just brings strain on the framework and infrastructure on what was a pleasant village to live. The increased traffic on the roads through Shepley is causing a rise in accidents some of which have been fatal. I am strongly against any further development of this scale within Shepley.</p>
