<p>I am a 13-year-old that lives on Knowle Park Avenue. I strongly believe that building an estate in the fields behind the Knowle would negatively impact our community.</p> <p>Starting off with children; many pupils that live in this area get early buses to Kirkburton Middle School or Shelley College around the time that adults go to work. The buses are very often full to the point where children are left behind and the schools need to email parents asking if any of them area available to go and run groups of children to school. If more people lived in this area, there would be a large increase in the amount of kids getting these buses, meaning that they would be even further over capacity. Along with this, there would automatically be a lot more cars around, causing traffic and inconvenience to anyone that's trying to get to work or school in rush hour. The main issue of increasing traffic is the amount of accidents that could potentially happen, as so many young children are around in the busiest hours of the day, all it takes is for a driver to speed down the main road while someone is pulling out of the Knowle for something really serious to happen. We rarely hear about these incidents happening, so if this estate is built and the percentage of car crashes rises, it's going to lower the standards of Shepley, with bad reviews due to lack of safety.</p> <p>Next, I could guarantee if you asked someone why they like living in Shepley, they would say the peaceful atmosphere. Shepley is such a quiet village, with a closely knit community, so if an estate was built here it would become more of a town like place, with more litter, louder volume levels and a general reduction to the village feel.</p> <p>In conclusion, I am against building houses in the field because of all these issues I have listed to you. I sincerely hope you have taken in mine and other peoples problems with this situation.</p>
