<p>I have concerns regarding this development on a number of grounds. This land is used for farming and covers environmentally protected land for shepley spring. These have gone hand in hand safely for the spring water on this land for many years, and in an area with many new houses over the past few years it's limited productivity and jobs must be protected.</p> <p>There have been many other housing developments and indeed one large development is as yet unfinished, the effect of this increased population on existing services should be seen +/- time for adjustments to be made prior to further increasing the population of the area too rapidly without this attention to infrastructure.</p> <p>The exit from the housing estate is not the safest onto a busy road at any time. It would not be feasible to prevent the cars belonging to those existing houses along the A629 main road parking near that junction as there simply isn't anywhere else for them to park, however it is an incredibly busy main road to pull out onto for the existing residents without increasing the number of cars needing to do so. To remove the alternative Knowle exit route would further worsen this, and be dangerous in winter conditions when this becomes the only safe exit for the whole existing estate.</p>
