<p>Re Eastfield housing development.</p> <p>This development of at least 110 houses SHOULD NOT TAKE PLACE for the following reasons.</p> <p>Firstly ShepleySpring is a well established BRITISH COMPANY with an excellent reputation for its spring water. The housing development will need to get rid of human waste and the installation of a sewage waste disposal tank so near to pure spring is ludicrous, there can be no guarantee that at some point Shepley Springs bore holes may become contaminated. This company employs well over 100 people and supports many village organisations and yet your planners seem happy to put the future of the firm and its employees in jeopardy. Have health and safety had a close look at these plans.</p> <p>Secondly access is a big problem. A one way system which puts untold pressure on a small estate road such as Eastfield, leading to the exit down a very steep incline at Lea Drive is NOT SAFE, this small road is concrete with tarmac on top. The extra traffic during construction and afterwards will undoubtedly damage this road, then there are the potential accidents when exiting a steep incline onto the main road, when visibility from parked vehicles, on the main road, could cause problems, again have highways planners seen these plans.</p> <p>Would the school be able to cope with extra influx?</p> <p>Our doctors can at times struggle with meeting patients needs, without extra burdens being added.</p> <p>Lastly the type of housing and percentage of AFFORDABLE homes is unsuitable. Yes, more homes are needed but on sensible sites and affordable sizes for first time buyers. In times of stress such as many are living in we need green spaces with grass, trees, living creatures and quiet peaceful areas THEY ARE VALUABLE TO ALL OF US.</p> <p>Thank you for reading this.</p>
