I believe this application is wrong for a number of reasons. It is on Green Belt Farming land that is vital for the local economy. It is not Grey Belt as suggested in the application. The Highways issues are significant as the additional number of vehicles (both those owned by the potential residents and delivery vehicles etc) going to and from the site will add to existing problems with traffic in this area. The suggestion of a one-way system of certain roads has it's own problems and makes no sense. The potential effect on Shepley Spring is a major concern. This is a local business that is a big employer of local people and has a knock-on effect to supplier businesses in the wider region. Shepley is a small village and large developments like this have significant effects on local amenities like schools and parking at shops and other local facilities. Whilst there is a train station the parking facilities there are very limited. Local bus services are already considered to be inadequate by local residents. The roads leading to the site are narrow and inadequate for coping with the increase in traffic this development will bring. This application, as outline as it is at this stage, should be refused.
