<p>I object to this application due to the environmental harm it would cause, particularly to woodland, wildlife habitats and the character of the landscape. A portion of the site lies within SPZ1, the highest groundwater protection zone, yet the applicant has only conducted a desk-based assessment rather than a full hydrological study. Any disturbance in this zone poses a direct risk to drinking-water sources, which is unacceptable. The proposal also fails to explain how overhead pylons crossing the site will be safely removed or managed. The ecological, water-safety and long-term environmental costs of this development far outweigh any suggested benefits.</p>
