<p>We are deeply concerned about the proposal to build houses on this field. The suggested one-way system would inconvenience all residents, but it would particularly disadvantage those living at the lower end of the road. Lea Drive is extremely steep, and during snowy or icy weather it becomes hazardous and is routinely avoided. If this were to become the only exit, the risk of accidents would increase significantly.</p> <p>We also have serious worries about the capacity of the current drainage systems. Homes situated at the bottom of the hill are especially vulnerable, and additional housing would place further strain on infrastructure that already feels inadequate.</p> <p>Local services are already stretched beyond capacity. The schools are full, and we have been unable to secure any additional nursery hours for our child because the nursery is operating at its limit. Introducing more homes would only intensify this pressure and reduce the availability of essential services for existing families. For these reasons, we strongly believe this development is unsuitable and should not proceed.</p>
