

Consultation Response from KC Landscape	
Application No:	2025/92776
Proposed Development:	Outline application, with all matters reserved, for residential development [110 dwellgs], with associated open space, landscaping, drainage infrastructure and associated works
Location:	land at, Eastfield, Shepley, Huddersfield, HD8 8HB
Applicant/Agent:	Banks Group Ltd
Planning Officer	Louise Bearcroft
Date Responded:	08.01.2026
Responding Officer:	Landscape
Responding Ref:	PP56

NOTES/COMMENTS: These comments are Without Prejudice

Submission of measured areas relating to their specific typologies of open space (to meet requirements of LP63) required as per validation checklist.

1. In the absence of detailed Landscape information, we are not able to provide definitive comments on the proposals in relation to design, planting choice or specification or national and local policies. However, based on the information available, we can highlight below potential issues that are likely to influence the nature of an acceptable scheme. To assist the prospective applicant, further information on key elements of landscape design is provided in item 1 below, which will help the applicant submit sufficient landscape and open space information to aid the planning process.
2. The list is intended to draw the prospective applicant's attention to likely landscape and open space issues that are specific to the site, and which may affect assessment of an application against open space and landscape policies. This list is not based on a comprehensive understanding of constraints particular to the site, therefore it is essential that the prospective applicant engages a suitably qualified landscape architect or similar to advise on specific site issues, opportunities and constraints.
3. Landscape Context and Concept, Landscape Design

Plans & documents considered/reviewed, including but not limited to:

-  Agricultural land classification - Grade.PDF
-  Agricultural land classification - report.PDF
-  Agricultural land classification.PDF
-  Arboricultural assessment.PDF
-  Biodiversity - assessment sheet + methodology.PDF
-  Design + access statement.PDF
-  Ecological appraisal + BNG assessment.PDF
-  Environmental designations plan.PDF
-  Geoenvironmental Prelim Investigation.PDF
-  Grey belt assessment.PDF
-  Heritage statement.PDF
-  Illustrative masterplan.PDF
-  Indicative landscape masterplan.PDF
-  KMC Landscape character assessment.PDF
-  Landscape + visual appraisal.PDF
-  Landscape and visual assessment criteria.PDF
-  Landscape character plan.PDF
-  Landscape masterplan.PDF
-  Planning statement.PDF
-  Screened zones of theoretical visibility.PDF
-  Site boundary plan.PDF
-  Site viewpoints.PDF
-  Topographical survey.PDF
-  Yorkshire Southern Pennine Fringe - Context map.PDF

Setting – this layout for 110 dwellings sit largely within the areas of parcels of agricultural land within the current greenbelt.

4. The proposed landscape layout drawing is sparse in terms of green structure, landscape proposal does not provide significant improvement to scheme or offer the existing landscape and setting strong enhancement. There is an opportunity to improve existing green structure providing robust mitigation and additional habitat.

The plan is indicative in landscape terms, therefore difficult to provide meaningful comments, however, some greenspace on site is shown and is welcome, however, consider access and purpose of the spaces being created. Will the spaces provided meet the needs of the widest possible range of users, be easily accessible and enjoyed by all people, regardless of visual, physical and cognitive ability, mobility, background or age. Are some of the areas shaded green more likely highways verges or buffer and screen planting than public open space?

5. We have concerns that the attenuation feature will impact the proposed landscaping and tree planting to one of the areas proposed as a public open space.
6. Plans should clearly show the impact of the proposed landscape planting on drainage infrastructure and visibility spays, particularly with proposed street trees and frontline tree planting/ trees in front gardens.
7. The landscape design is important and green spaces created should form a sustainable and resilient public realm, incorporating meaningful sustainable design principles. Landscape proposals and designs should be of high quality, ensure any activities consider and meet the needs of people of all ages. Landscaped areas should address and enhance existing site conditions, air, and water quality, and increasing green infrastructure to promote biodiversity.
8. Consideration for incorporating accessible spaces, ramps with a 1:21 gradient, designing with inclusivity in mind & creating landscapes that prioritize health and well-being,
9. In addition to a key aspect of providing welcoming accessible pathways and circulation routes, consideration of seating options that cater to a range of users should include benches at a various distance/resting points. Details should be well thought out, such as benches with backrest and armrest for individuals who requires support, together with benches with varying heights to accommodate people of different sizes, abilities,

as well as shaded for comfort and usability will also need consideration. Inclusivity extends into visual experience in greening, viewpoints, planting design, paving design for a multi-sensory environment that engages individuals. The design of open green space should also consider acoustics that enhances the users experience of the outdoor environment.

10. The landscaping is indicative but if the landscaping scheme can be secured by condition then it should also be to prevent the proposed quality and number of trees from being eroded in any subsequent applications.
11. Greenspace on site is welcome, however, consider access and their purpose (and typology). Will the space provided meet the needs of the widest possible range of users, be easily accessible and enjoyed by all people, regardless of visual, physical and cognitive ability, mobility, background or age and ensure sustainable, resilient natural environments that support the wellbeing of communities.
12. Plans should clearly show the impact of the proposed landscape planting on drainage infrastructure
13. On-site mitigation is preferred for genuine, long-term benefits for people, place and nature.
14. Green spaces should be "high-quality," and ensure that the green space is substantial enough to accommodate a variety of recreational activities, making it an inviting hub for people to spend time in. POS and access routes designed and located to address crime prevention, anti-social behaviour and terrorism considerations.
15. Green space areas on site: are they managed and maintained by a private/resident management company?
16. In landscape design terms, ensure that there is a clear definition of residential amenity and an appropriate defensible space for the dwelling, consider means of natural surveillance of the open space or green space and secure by design matters are fully considered.
17. Where open space or the area around the attenuation pond abuts residential gardens, the curtilage and the adjacent Public Open Space should be clearly and carefully designed to be well defined, have purpose and be feasible with tree planting, encouraging dwell time and usage.
18. Carefully consider all opportunities for appropriate tree planting and other screening planting could additionally help the proposed development comply with policies and guidance regarding design, biodiversity, health and wellbeing and other relevant planning considerations.
19. New developments are to retain and incorporate existing significant trees within the layout as stated within Kirklees Local Plan policy LP33. Tree planting adjacent to carriageways accords with the West Yorkshire Combined Authority's "Green Streets" principles, as well as paragraph 136 of the NPPF.
20. Please also be reminded of the council's advice regarding Green Streets principles, as well as paragraph 131 of the NPPF, which requires new streets to be tree-lined.
21. *"Trees make an important contribution to the character and quality of urban environments, and can also help mitigate and adapt to climate change. Planning policies and decisions should ensure that new streets are tree-lined**, that opportunities are taken to incorporate*

trees elsewhere in developments (such as parks and community orchards), that appropriate measures are in place to secure the long-term maintenance of newly-planted trees, and that existing trees are retained wherever possible. Applicants and local planning authorities should work with highways officers and tree officers to ensure that the right trees are planted in the right places, and solutions are found that are compatible with highways standards and the needs of different users.”

*** Unless, in specific cases, there are clear, justifiable and compelling reasons why this would be inappropriate*

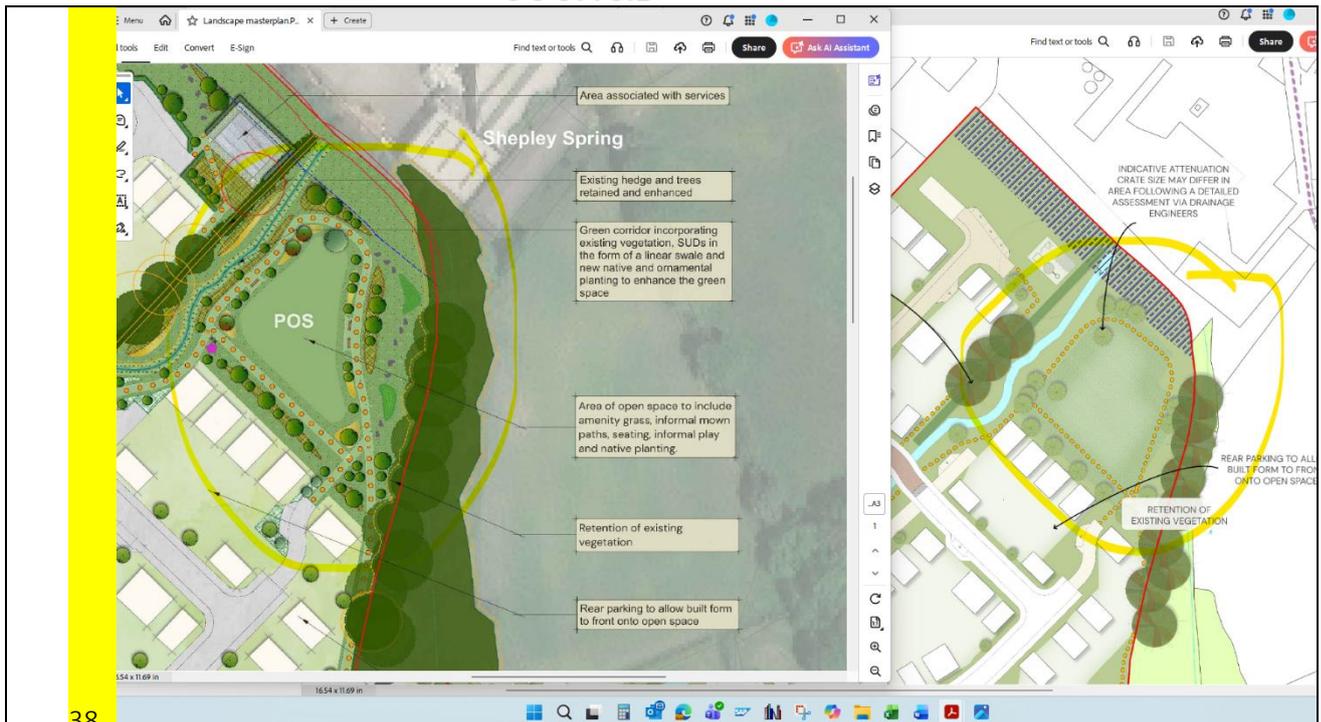

22. Landscape proposals, particularly frontline tree planting and planting to open spaces, should identify all proposed root protection/barriers, drainage, suds and attenuation or soakaways and all easements to ensure trees are accommodated satisfactorily.
23. Additionally, we would anticipate all new tree planting and native hedgerow planting within 5m of the adoptable highway to include adequate root barrier, clearly identified on the proposed landscape plans. In addition – visibility spays should clearly demonstrate the street tree planting and front garden trees are acceptable to Highways road safety and H&S.
24. Details should be submitted for proposed tree planting in front gardens and highways verges demonstrating adequate soil volumes and tree pit details to support the growth of the tree for the long term, such as: the volume of tree pits, details of soil volume & root management, details of installation, timing/planting season and long term management.
25. We remain aligned with Paragraph 135 of the National Planning Policy Framework (NPPF), ensuring that the quality of approved development is maintained from permission through to completion. This includes preventing material changes to the permitted scheme, such as alterations to approved materials, removal of street trees, or modifications to agreed typologies for public open space (POS).
26. Access: Proposed paths either linking to or from open space should not connect onto private drives or parking spaces, as this will cause access issues and conflict for future residents and members of the public accessing the public open spaces.
27. The design and construction of a network of cycleways and pathways should showcase the developers aim and commitment to promoting sustainable and eco-friendly transportation options. We will require details of how the landscaped areas or open spaces link and demonstrate accessibility for all and how they enable people to experience and appreciate the natural environment. The aim should be to enhance connectivity of the spaces within the new development and beyond and to create a network of pathways and connections that promote interaction between people and nature.
28. Preference is for native plants and for plants proven as beneficial to pollinators where possible for this location. Native, fruit bearing species preferred where appropriate.
29. Invasive non-native species pose a significant threat to biodiversity in Britain. When submitting detailed landscape proposals, preference is for species which are native, fruit bearing species, where appropriate. Potentially invasive species are not favourable and details from the list published by Natural England [can be found here](#). [Horizon-scanning for invasive non-native plants in Great Britain - NECR053 \(naturalengland.org.uk\)](#)

There's some further guidance on [NNSS on alternative species to use for landscapers here](#).

Species selection is important and those which are potentially more invasive should be substituted for less potentially invasive species.

No plant species located on part 2 of schedule 9 of the [Wildlife and Countryside Act 1981 \(legislation.gov.uk\)](#) will be considered.

30. [HTA | HTA Guide to Potentially Harmful Plants, 3rd Edition \(2022\)](#) - Plants are labelled in three categories - A, B and C - according to the severity of the hazard. With the exception of those in category A, it is recommended that these are not planted where small children and pets are likely to have access to brush against or eat them.
31. Mitigating and Enhancing Biodiversity: Providing it does not conflict with the primary recreational function of a space/facility, developers should consider how net benefit for Biodiversity can be incorporated into the proposed landscape scheme. Planting design should support biodiversity and mitigate the impacts of the development.
32. This scheme should demonstrate habitat areas, planting native species, and creating ecological corridors to facilitate the movement of wildlife.
33. Landscape scheme and layout should avoid dominance of hard surfaces/car parking to frontages
34. The remaining landscaping scheme is acceptable. However, it doesn't look like any management plan for the scheme has been submitted. The plans should provide details of planting and maintenance requirements for the trees and planting to meet our expectations.
 - We will need to see a management plan for the landscaping scheme to ensure the scheme successfully establishes. The management of newly establishing trees should include, but is not limited to, a watering regime, monitoring of stakes and ties, formative pruning, replacement of failed or damaged trees.
35. Landscape maintenance and management plans can be dealt with via pre commencement condition – see indicative condition below.
36. Much of the landscaping is indicative at this stage but if the landscaping scheme can be secured by condition then it should be to prevent the quality and number of trees from being eroded in any subsequent applications.
37. SuDS: Enhancing and including Nature-Based Solutions: how does this scheme integrate nature-based solutions, particularly to enhance the ecological function of the landscape. Consideration of retention ponds, rain gardens, and bio-swales in softscape areas to mitigate flooding, slow the flow and improve water quality and how does this meet the needs of accessible and attractive useable POS in this location? Can this site include trees in the locations proposed on top of the attenuation infrastructure?

38.

39. The open space and landscaped areas should be promoting Healthy and Outdoor Lifestyles by providing opportunities for outdoor activities and recreation. This can involve designing looped paths, fitness stations, informal sports and play areas that cater for people of all ages, abilities and backgrounds.

40. Meeting LP63 for open space typologies, on site and/or off site provision

The Developer should refer to the adopted Open Spaces SPD ([Open Space SPD \(kirklees.gov.uk\)](http://kirklees.gov.uk) published June 2021) which sets out the requirements for open space, sport and recreation provision to serve new housing developments and other SPD's for design etc: [Adopted Supplementary Planning Documents \(SPDs\) | Kirklees Council](#)

The Developer should refer to the [Kirklees Playing Pitch Strategy Stage D Report January 2025](#) for addressing needs and shortfalls regarding outdoor sports requirements.

41. These SPDs operate on a “comply or justify” basis; if proposals deviate from guidance, applicants should provide justification within the initial planning submission. [Fields in Trust Standards: Creating great spaces for all](#) should also be considered where it is in line with our SPD.

42. 110 or 120 dwellings triggers amenity greenspace and the majority of other typologies in LP63.

43. Number and type of dwellings trigger amenity greenspace in LP63 and all other typologies as 110 (or 120) dwellings as all deficient in quality. In addition, Parks and recs and natural and semi natural are both also deficient in quantity so these would be welcomed on site to help address shortfalls.

44. Ward deficiencies

Select Ward	Current Open Space Provision Compared to Quantity Standards			
	Amenity Greenspace (ha per 1000 pop)	Parks & Recreation Grounds (ha per 1000 pop)	Natural & Semi-Natural Greenspace (ha per 1000 pop)	Allotments (ha/p 1000 households)
Kirkburton	0.41	0.5	0.95	0.52
Current Open Space Provision Compared Quality & Accessibility Standards	Req'd for Acceptability & Def in quality	Def in quality & quantity	Def in quality & quantity	Def in quality

Amenity greenspace is required to make the development acceptable and although there is amenity greenspace within 720m it is of low or medium quality.

In accordance with LP63, SPD June 2021 Updated with rates from April 2025

Date: 08 Jan 2026
 Development: 2023.92776 PP56 Land at Eastfield Shepley 110 dwlgs

NOS Dwelling Count for Calcs (Table 1 LPS) New Open Space	Input Number of Houses	Amenity Greenspace	Amenity Greenspace (sq.m space per dwelling)	Parks & Recreation Grounds	Parks & Recreation Grounds (sq.m space per dwelling)	Natural & Semi-natural Greenspace	Natural & Semi-natural Greenspace (sq.m space per dwelling)	Allotments/Community Growing	Allotments/Community Growing (sq.m space per dwelling)	Children & Young People	Children & Young People (sq.m space per dwelling)	Outdoor Sports	Outdoor Sports (sq.m space per dwelling)
Market/Affordable Housing (100%)	110	Yes	1603.8	Yes	2138.4	Yes	5346	Yes	550	Yes	1474	Yes	2310
Market/Affordable Housing 2-bed Flats (75%)	0	Yes	0	Yes	0	Yes	0	Yes	0	Yes	0	Yes	0

Totals	110		1603.8		2138.4		5346		550		1474		2310
Qualifying POS meterage for this development?			Yes		Yes		Yes		Yes		Yes		Yes
Total meterage for this development			1603.8		2138.4		5346		550		1474		2310

45. Outdoor sports provision will be required as an off site contribution and will be assessed with Parks officers, stakeholders & Playing Pitch Strategy which identifies deficiencies in the quantity and quality of playing pitches.
46. Any separation distance from LAP's, LEAPs, should be measured to the boundary of the garden not the residential property itself. The Environmental Protection Act considers gardens as premises, and the boundary is where anything should be measured to/from. The play equipped areas will therefore need a 20m buffer from the garden boundaries if on site provision is included.
47. Dwelling triggers for Children & Young Peoples Provision: 110 or 120 dwellings does trigger CYPP – **a LEAP**

Scale of Development	Local Area for Play (LAP)	Locally Equipped Area for Play (LEAP)	Neighbourhood Equipped Area for Play (NEAP)	Multi-Use Games Area (MUGA)
1-10 dwellings	x	x	x	x
11-50 dwellings	✓	x	x	x
51-200 dwellings	x	✓	x	x
201-500 dwellings	✓	✓	x	Contribution
501+ dwellings	✓	✓	✓	✓

Refer to Fields In Trust
[Guidance-for-Outdoor-Sport-and-Play-England](#)

48. On site or off site & Existing facilities in the vicinity: The site lies within the acceptable guidelines for proximity to existing provision with both Jos Lane and Shepley Rec within a 15min walk and less than 720m away we would recommend an off-site lump sum contribution towards existing Children and young people’s provision. Parks and recs, would be beneficial on site, but there is also Shepley Rec which would be improved with off site contribution towards Parks and recs infrastructure improvements and adjacent to the site.

49.

Play Areas in [Circle1]		
Name ↑↓	Easting ↑↓	Northing <
Jos Lane	419176	409969
Shepley Rec	419429	409576
Cliffe House Field Stud,	419242	409474

50.

51. For the typologies not able to be provided on site, there are other existing greenspace and open space facilities in the vicinity, within the recommended 720m for accessibility of the site, which would require enhancement in lieu of on-site provision, potentially, although consultation will be undertaken, with stakeholders, local community and local councillors. Examples include the marsh lane allotments etc.
52. Delegated approval will be sought for the locations for the off site lump sums. This will be post planning permission when Section 106 planning obligations are paid, and schemes can become ‘live’, local engagement helps shape and inform the individual POS schemes identified for improvement.
53. Negotiation of a commuted sum with the Local Planning Authority may be required to fund off-site improvements through a Section 106 or similar legal agreement.
54. Community and councillor consultation occurs post-permission, once Section 106 obligations are secured, to shape and inform enhancement schemes.
55. We will require the measured areas relating to the different typologies for the on site pos provision in order to be able to calculate, more accurately, the off site contributions in lieu of sufficient pos being provided on site in the respective typologies. The table below demonstrates the typologies triggered and requirements in sq.m. or off site £ contribution with/without on site pos provision for 110 units.

Total Dwelling no	110	Complete (B) POS details below		
Is POS being provided by developer?	Yes			
A. POS REQUIREMENTS SUMMARY	Cost (see below)	Admin @ 15%	Total Cost incl admin	Meters (see above)
Amenity Green Space	£46,825.72	£7,023.86	£53,849.57	1603.80
Children & Young People	£58,620.84	£8,793.13	£67,413.96	1474.00
Parks & Recreation	£65,058.87	£9,758.83	£74,817.70	2138.40
Natural & Semi-Natural Green Space	£55,651.37	£8,347.71	£63,999.08	5346.00
Allotments/Community Growing	£5,853.44	£878.02	£6,731.46	550.00
Outdoor Sports	£41,649.52	£6,247.43	£47,896.95	2310.00
TOTAL	£273,659.76	£41,048.96	£314,708.72	13422.20
Shortfall/POS Requirement from developer:	£273,659.76			
Admin at 15%	£41,048.96			
Shortfall/POS Requirement from developer:	£314,708.72			

56.

57. If the applicant submits a plan showing suitable and appropriate open space and the measured areas of their typologies, we can re-calculate this sum to reflect the on site provision. The current plan does not reflect the limitations usually associated with attenuation features and their easements

B. Complete ONLY if POS supplied by Developer		Remaining sq m		0.00		
Input POS area to be provided(sq.m)	14325	INPUT % OR sq. m				
Development: 2025.92776 PP56 Land at Eastfield Shepley 110 dwllgs		Date: 08 Jan 202				
POS REQUIREMENTS SUMMARY	Cost (see below) excl admin	Sq Meters Req (based on no of dwellings)	Allocate Developer POS %	Developer POS Sq m Allocated	Value of developer POS	Outstanding Developer POS
Amenity Green Space	£46,825.72	1603.80		5602	£46,825.72	0
Parks & Recreation	£65,058.87	2138.40			£0.00	£65,058.87
Natural & Semi-Natural Green Space	£55,651.37	5346.00		8723	£55,651.37	0
Allotments/Community Growing	£5,853.44	550.00			£0.00	£5,853.44
Outdoor Sports	£41,649.52	2310.00		0	£0.00	£41,649.52
Children & Young People	£58,620.84	1474.00	100% provided?	Min sq.m

					£0.00	£58,620.84
TOTAL Cost (excl admin)	£273,659.76	13422.20		14325	£102,477.09	£171,182.67
Outstanding POS Requirement from developer:	£171,182.67					
Admin at 15%	£25,677.40					
Inspection Fee (see Manco Fees Guidance tab)	£1,224.67					
Shortfall/POS Requirement from developer (rounded):	£198,085					

58.

59. Wildlife and habitat networks, TPO's, PROW : links & connectivity: needs to be demonstrated as being feasible in the locations and well designed with tree and shrub planting, – and not reduced by the drainage easements, visibility splays etc. all root barriers need to be shown and proximity to attenuation features to ensure tree planting and infrastructure and proposals are viable.

60. Buffer to existing trees and woodland to boundary – to east and south.

61. The Council has an obligation in respect of Public Sector Equality Duty (Equality Act 2010) and therefore mown grass paths across open greenspace are not acceptable versus bitmac or bound gravel paths.

62. Linking surfaced footpath networks are welcomed, supporting and encouraging creating healthy active travel routes and improvements that promote and facilitate greater use of the public openspaces and a strong integration with the surrounding new and existing communities, refer to the Highways Design guide: [Highway Design Guide Supplementary Planning Document \(SPD\) \(kirklees.gov.uk\)](#)

With regards our comments on the information provided in the application, these are without prejudice and are not to be read as approval on the principle of development on this currently greenbelt site.

Summary Checklist

1. Measured areas should relate to typologies of open space (LP63) and we have concerns that there may be a conflict with attenuation features and tree and shrub planting and public open space infrastructure;
2. SuDS integration and avoidance of landscape conflicts
3. Detailed hard and soft landscape plans will be required including details of species, density, size, location, and root barriers for trees and native hedgerow species within 5m of pavements and highways;
4. Species list with avoidance of potentially invasive plants (Natural England list)
5. Landscape Management & Maintenance Plan (LMMP);
6. Confirmation of soil volumes for trees and tree pits;
7. Accessibility features: paths, seating, gradients, inclusive design for public open spaces and footpath links;
8. Amenity greenspace and equipped play provision (LEAP triggered)
9. Biodiversity enhancements and ecological connectivity – any conflict with POS usage/access and dwell time, thorny species next to footpaths and seating areas
10. Trigger points for POS delivery and S106 contributions to be agreed early
63. Management company details and inspection fees for on site pos to be confirmed and agreed (and s105 drawing numbers and references for accepted landscape plans – bearing in mind we remain aligned with Paragraph 135 of the National Planning Policy Framework (NPPF), ensuring that the quality of approved development is maintained from permission through to completion. This includes preventing material changes to the permitted scheme, such as alterations to approved materials, planting, play equipment or natural play features, removal of street trees, or modifications to agreed typologies for public open space (POS).
11. Compliance with LP24, LP30, LP31, LP33, LP63 and relevant SPDs
12. Fields in Trust standards and buffer zones for any play features
13. Pre-commencement conditions and phasing requirements agreed.

Advice to planning officer:

Required Actions-

- Please show drainage infrastructure on the landscaping plans, to demonstrate no conflict between landscape proposals, shrubs, trees and drainage.
- Please show visibility splays on landscape plans to demonstrate no conflict between landscape proposals, shrubs, trees and vehicular and highways visibility.
- pre-commencement condition is necessary to ensure all details relevant to landscape matters and s106 triggers and requirements for POS and contributions

are agreed at an appropriate stage of the planning process, including landscape inspection fee.

- Introduce bins and benches into amenity greenspaces.

Landscape – it would be prudent, given the setting of this scheme, to secure early submission of Landscape details for both hard and soft landscaping, together with a Management Plan and conditions suggested A, B, C and D below.

S106 should include the landscape scheme with reference to all Drawing nos: xxx being annexed to it, together with the text “together with such amendments as the Council may reasonably require”.

A s106, or similar, will be required with full details of the management and maintenance of the areas of on site Public Open Space, footpaths and planted slopes and bankings for the lifetime of the development, off site lump sums, inspection fee and contact for the private management company or resident management company arrangements. **The condition for the Landscape Maintenance & Management Plan:** See condition indicative for LMMP below.

Submission of measured areas relative to their typologies for open space to meet requirements of LP63 as per validation checklist – and including the drainage infrastructure so as to not potentially have pos areas devoid of tree and shrub planting.

If outline permission is granted we will require a detailed landscape plan clearly demonstrating the principles of the landscape design and the concept with thought to the context and setting at reserved matters stage, together with the details of access to amenity greenspace measured areas clearly labelled.

Should sufficient detailed landscape information not be forthcoming, we will require full detailed landscape proposals as per point 1 below together with details of the management and maintenance of the areas of Public Open Space for the lifetime of the development in the Planning Condition.

Once the above information is received, KC Landscape should be consulted once again, and appropriate conditions can be brought forward.

PROW: are the POS paths dedicated as highway: Yes / No

Has the developer considered an environmental and biodiversity toolkit for gardens for residents to incorporate such as fruit tree planting, compost bins, hedgehog houses, water butts and rain gardens?

All S106 Agreements should have indexation added to financial payments requirements

S106 HoT

Off Site Open Space & Location of site/s to receive POS contribution : £ towards existing facilities in the vicinity of the development.

By:. Preferably prior to occupation of 25% of dwellings (N.B. we're likely to require the payment or any final instalment earlier than the final dwelling, to avoid disincentivising completion)

Trigger points if payments phased: Preferably prior to occupation of 25% and 50%

On-site POS

- **Trigger point:** Preferably prior to occupation of 50% for LEAP (or 75% for both areas of POS, LAP & LEAP)
- **Trigger points if phased:** Preferably prior to occupation of 50% &/or 75% of dwellings
- **Open Space** - means the open space including play equipment to be provided on the Site as part of the Development comprising the landscape scheme in Drawing no: xxx annexed hereto, together with such amendments as the Council may reasonably require;
- To provide the On-Site Open Space identified in the Approved Open Space and Drainage Scheme in accordance with the specification therein prior to first Occupation of 85% of the Dwellings and comprising the landscape scheme in Drawing no: xxx annexed hereto, together with such amendments as the Council may reasonably require.
- To provide written notification to the Council of completion of the On-Site Open Space within 20 Working Days of completion.
- To pay the **Open Space Inspection Fee** to the Council within 20 Working Days of receipt of written request from the Council (PROVIDED THAT such request shall not be made any earlier than the date of the Council's inspection of the On-Site Open Space and nothing in this paragraph 3.3 requires the Owner to pay the Open Space Inspection Fee on any date which is earlier than 20 Working Days after the inspection).
- Subject to paragraph xxx to maintain and manage in perpetuity the On-Site Open Space and drainage infrastructure in accordance with the Approved Open Space and Drainage Scheme by way of incorporation of a Management Company which is registered at Companies House:
 - (a) which may already be in existence or which may be formed by the Owner for the purposes of carrying out the maintenance of the onsite open space and drainage infrastructure in accordance with this deed and which is incorporated in England and Wales or Scotland;
 - (b) which has its registered office in England and Wales or Scotland; and
 - (c) whose primary object is permitted to maintain and renew the drainage infrastructure and

On-Site Open Space.

- Not to transfer the On-Site Open Space to a Management Company until such time as the Council has certified in writing that the On-Site Open Space has been provided in accordance with the Approved Open Space and Drainage Scheme.

Corresponding obligations for the Council:

- To inspect the On-Site Open Space within 20 Working Days of the date of receipt of notification of completion of the On-Site Open Space from the Owner.
- To provide to the Owner, as soon as is reasonably practicable after an inspection during which the Council (acting reasonably) concludes that the On-Site Open

Space has been provided in accordance with the Approved Open Space and Drainage Scheme, certification in writing confirming that to be the case.

- **Bonds: or deposit – yes if there is on site POS with equipped provision and an off site contribution**
- **Index linked: Always Yes** - All S106 Agreements should have indexation added to financial payments requirements
- The Developer covenants with the Council not at any time to use or allow the Open Space Land to be used as a site compound for the storage of construction materials and plant and/or the location of a site office in connection with the Development (unless otherwise agreed in writing with the Council).
- The Developer shall at its own cost and expense construct lay out and substantially complete the Open Space Works in a proper and workmanlike manner with sound and good quality planting and materials in accordance with good horticultural and ecological practice to adoptable standards and to the reasonable satisfaction of the Council.
- **Inspection and certification charge (simple, routine or complex see fee sheet): Yes –** as there is substantial POS being created on site with equipped provision and key landscape features being planted
The Inspection fee, to be paid within a reasonable time after the inspection and certification by the council that the on site pos has been created (preferably as per the approved plans) and this fee shall **NOT** be tied in to the adoption by a private/residents management company nor any land transfer to the same).
- **Private/Resident Management company details: Yes to be supplied prior to substantial completion of the on-site POS**
- **Landscape Plan reference number (showing relevant areas of POS highlighted):**
Shows on site POS shaded and or bounded by a colourful line

Conditions: TBC

Recommended as:

A. Landscape Condition

Prior to works commencing on the superstructure, a landscape management and maintenance plan (LMMP) for the external areas including any open space accessible to the public, playing fields etc shall be submitted to, and approved in writing by, the Local Planning Authority. This should include:

- a) The landscape plan including all hard and soft details together with planting plan & specification, location and specification of any play equipment or play elements and playable/educational spaces or sports facilities/pitches including any surfacing (including where appropriate safety surfacing and anti-wear surfacing), structures such as street furniture seats, litterbins bollards, picnic tables and means of enclosure.

- b) An implementation, management and maintenance programme including full details for management of newly establishing trees including, but not limited to, a watering regime, monitoring of stakes and ties, formative pruning, replacement of failed or damaged trees.
- c) Details of initial aftercare and long-term maintenance for minimum of 5 years and seasonal maintenance operations. This should also include any SuDS features, existing trees and vegetation retained on site, slopes and bankings, woodlands, plus management of any equipment or playable/educational space, including where relevant RoSPA safety inspections.
- d) Details of monitoring and remedial measures, including replacement of any equipment, safety surfacing, site furniture, trees, shrubs, hedgerows or planting that fails or becomes diseased within the first **five** years from completion.
- e) The approved landscaping scheme shall, from its completion, be maintained for a period of five years. If, within this 5 year period, any tree, shrub or hedge shall die, become diseased or be removed, it shall be replaced with others of similar size and species unless the Local Planning Authority gives written consent to any variation.
- f) This pre-commencement condition is necessary to ensure all details relevant to landscape matters and s106 triggers and requirements for POS and contributions are agreed at an appropriate stage of the planning process.

The works shall thereafter be carried out in accordance with the management and maintenance plan and retained for the lifetime of the development.

Reason: To enhance and conserve the visual amenity of the built environment as well as the natural environment in accordance with Policies LP24, LP30, LP32, LP35 and LP63 of the Kirklees Local Plan as well as Chapters 12 and 15 of the National Planning Policy Framework.

- B. Prior to the commencement of development full details of both hard and soft landscape works shall be submitted to and approved in writing by the Local Planning Authority. These works shall include: (a) Means of enclosure around the site, including gates; (b) Materials to be used for all hard surfaced areas (c) Soft landscape works to include planting plans; plant schedules noting species, plant sizes and proposed numbers/densities where appropriate, a plan of existing trees and tree features (such as groups of trees or woodland) to be retained and to be removed in accordance with BS5837(2012); any new trees showing their species, spread and maturity and new planting plans with written specifications (including cultivation and other operations associated with plant and grass establishment) and schedules of plants (including the location, number, species, size and planting density); (d) an implementation, management and maintenance programme including full details for management of newly establishing trees including, but not limited to, a watering regime, monitoring of stakes and ties, formative pruning, replacement of failed or damaged trees. (e) Impact of the proposed landscape planting on drainage infrastructure; (f) any suds, earth mounds or depressions; (g) The approved landscaping scheme shall, from its completion, be maintained for a period of five years. If, within this 5 year period, any tree, shrub or hedge shall die, become diseased or be removed, it shall be replaced with others of similar size and species unless the Local Planning Authority gives written consent to any variation. All hard and soft landscape works

shall be carried out in accordance with the approved details. The works shall be carried out prior to the occupation of any part of the development or in accordance with the implementation programme agreed with the local planning authority

Reason: To enhance and conserve the visual amenity of the historic built environment as well as the natural environment in accordance with Policies LP24, LP30, LP32, LP35 and LP63 of the Kirklees Local Plan as well as Chapters 12 and 15 of the National Planning Policy Framework.

- C. **All planted materials shall be maintained for five years** and any trees or plants removed, dying, being damaged or becoming diseased within that period shall be replaced in the next planting season with others of similar size and species to those originally required to be planted unless the council gives written consent to any variation. Reason: In the interests of the visual amenity and character of the surrounding area and to accord with Policies LP24 and LP63 of the Kirklees Local Plan.

Reason: In the interest of visual and residential amenity, to ensure that there is a well laid out scheme of hard and soft landscaping, to comply with the aims and objectives of Policy LP24 & LP63 of the Kirklees Local Plan and Chapter 12 of the National Planning Policy Framework

- D. No building shall be occupied until a Landscape Maintenance & Management plan (LMMP) (LMMP) has been submitted to and approved in writing by the local planning authority which also includes the SuDS features. The scheme shall provide the means of providing biodiversity enhancement, and full details of how the landscaped areas, fruit trees and the playable spaces will be managed and maintained in perpetuity.

Reason: In the interest of visual and residential amenity, to ensure that there is a well laid out scheme of hard and soft landscaping, to comply with the aims and objectives of Policy LP24 & LP63 of the Kirklees Local Plan and Chapter 12 of the National Planning Policy Framework

Rootspace engineered tree pits

- E. The installation of root space engineered tree pits and specified trees below hard surfacing shall be monitored by the manufacturer and a letter confirming monitoring of, and satisfactory installation of the trees, as per the landscape scheme drawings shall be submitted on completion of the same to and approved in writing by the Local Authority.

Reason: To minimise the effect of development on the area and enhance and conserve the visual amenity of the environment as well as the natural environment in accordance with Policies LP24, LP30, LP32, LP35 and LP63 of the Kirklees Local Plan as well as Chapters 12 and 15 of the National Planning Policy Framework.

The information below is intended for the applicant to consider and include in any amendments of support the application in order to help provide sufficient landscape and open space information to aid the planning process:

1. Full landscape proposals are required as a planning condition including hard and soft landscape details and planting plans to create a diverse and attractive landscape which should enhance the setting of the development. Thoughtful planting to incorporate native species would contribute to enhancing the biodiversity in this setting and would help in the development of green corridors as well as providing

valuable mitigation for existing local residents or those in the vicinity who will be overlooking this development should permission be granted. All details relating to existing retained trees and vegetation should also be provided, including their protection during the development.

- Conditions will be included to secure detailed landscape plan and long-term management. For developments where detailed landscape design has not yet been agreed and the design needs to fulfil a requirement for ecological mitigation and/or enhancement tree planting.
 - No development shall take place until a landscape and ecological design (LEDS) has been submitted to and approved in writing by the local planning authority. The scheme shall provide the means of providing biodiversity enhancement, given the location and an inclusive and accessible public open space, managed and maintained in perpetuity.
 - We will require full detailed landscape plans indicating full planting specification, including:
 - Layout, species, number, density and size of trees and plants and/or seed mixes and sowing rates, including extensive use of native species. Any phasing of the works
 - Details of all hard landscape materials and boundary treatments, garden fences/walls etc. Proposed treatment to existing boundaries.
 - Timetable for implementation demonstrating that works are aligned with the proposed phasing of development.
 - Persons responsible for implementing the works.
 - Location and detailed design & layout of any public open space and maintenance responsibility for Public Open Space (POS), any equipped area and playable space.
 - Landscape Management and Maintenance Plan (LMMP) required including details of initial aftercare and long-term maintenance for minimum of 5 years. This should also include any existing trees and vegetation retained on site, plus management of any equipment or playable space, including safety inspections.
 - Details for monitoring and remedial measures, including replacement of any trees, shrubs or hedge that fails or becomes diseased within the first five years from completion.
 - The Landscape Management and Maintenance Plan (LMMP) shall be implemented in accordance with the approved details and all features shall be retained in that manner thereafter.
 - Any s106 requirements for off site contributions and all S106 Agreements should have indexation added to financial payments requirements
2. The Council considers a presumption in favour of tree planting in verges and adjacent to carriageways in line with the West Yorkshire Combined Authority 'Green Streets[®]' principles, unless there are valid reasons for their omission. Refer to the Highways Design guide: [Highway Design Guide Supplementary Planning Document \(SPD\) \(kirklees.gov.uk\)](https://www.kirklees.gov.uk/highways-design-guide-supplementary-planning-document-spd). Tree planting is very important and getting the right types and size of trees in the right places is imperative. Trees should be incorporated in the scheme for a variety of reasons: to a) visually break up the built form b) help to screen/ mitigate or frame certain views c) support biodiversity and create green corridors/green links, d) not to create a nuisance in peoples gardens through leaves in gutters or screen the sun etc. e) not to cause damage to property boundaries/garden fences/dry stone walls in the future, or damage any SuDS system. There are opportunities for tree planting within the site and this will help mitigate the scheme. That being said, careful design is required. Trees should be incorporated into the street where possible but when necessary, in gardens, not being located too close to buildings.
 3. The scheme should consider how trees and street lighting should be specified together to avoid tree canopies from obstructing large amounts of street lighting and provision of a maintenance schedule for trees to ensure safe levels of lighting at street level once trees mature.
 4. Policy LP24 of the Kirklees Local Plan advises that good design should be at the core of all proposals in the district. This reflects guidance within the National Design Guide and the National Planning Policy Framework, at Paragraph 126, which confirms that the creation of high quality, beautiful and sustainable buildings and places is fundamental to what the planning and development process should achieve. Good design is a key aspect of sustainable development, creates better places in which to live and work and helps make development acceptable to communities.
 5. Policy LP31 – Strategic Green Infrastructure Network states that priority will be given to safeguarding and enhancing green infrastructure networks, green infrastructure assets and the range of functions they

provide. Development proposals within and adjacent to Strategic Green Infrastructure Networks should ensure: -

- a. The function and connectivity of green infrastructure networks and assets are retained or replaced.
- b. New or enhanced green infrastructure is designed and integrated into the development scheme where appropriate, including natural greenspace, woodland, and street trees.
- c. The scheme integrates into existing and proposed cycling, bridleway and walking routes, particularly the Core Walking and Cycling network, by providing new connecting links where opportunities exist.
- d. The protection and enhancement of biodiversity and ecological links, particularly within and connecting to the Kirklees Wildlife Habitat Network
