Dear Sir, Madam

As a resident of Shepley since 1988  
I am writing to object to the proposed housing development above

My objections are the same as the majority in the village, namely;  
The fields are green field / farming fields for as long as I have lived here. They are not a brown field site

Access to the site, through existing residential housing  
Traffic congestion , I access the main road via yew tree road. It is already a very busy junction, which includes a school bus stop on either side and Lorries accessing Shepley spring etc

I cannot begin to contemplate the risk of an accident with the proposed number of houses and associated cars

The threat to Shepley spring as a business

How can the local primary school cope with such an influx  
One way systems around knowledge park and risk to and from the main road

Double yellow lines on Lea drive , what have home owners and visitors fine to deserve a no parking zone

Accessing the site itself via a residential area and known school run

Pressure on wider local resources and facilities

Thank you

Bank hall grove  
Shepley
