Subject: Eastfield 2025/60/92776/E

I would like to comment on the above proposed Eastfield Development.

1. The proposed development site is on a Protection Zone designated by the Environment Agency thus ensuring Shepley Spring water is free from pollutants. Building construction over a number of years could critically contaminate the spring water.

This could crucially affect the future of the company which is a major long term employer in Shepley.

2. The proposed development of 110 houses will require heavy construction traffic to use Lea Drive to gain access to the site. I believe this is unacceptable to local residents who are going to be affected over what will be a number of years.

Thank you.
