Subject: 2025/92782 at location Land off, Litherop Lane, Clayton West, Huddersfield, HD8 9LT

Please see ecological commentary below:

Designations

No issue

Onsite habitats and species.

Works are taking place directly adjacent to trees and hedgerows, which will impact commuting species; as well as within 200m of Bentley Brook and River Dearne. As a result, a CEMP will be conditioned; along with tree/hedgerow protection and lighting strategy requirements. At this point in time I do not believe a PEA is warranted – however I do think the DLL (NatureSpace) should be consulted for GCN and the local Badger Group should also be consulted for data.

BNG

An excel format of the statutory metric does not appear to be available for validation.
No further comments will be provided until this has been provided and reviewed.

Suggested conditions

BNG conditions to be provided once further information is retained and reviewed.

Habitats / Species

A condition for a CEMP: Biodiversity (Construction Environment Management Plan) is advised, e.g.

No works shall take place until a Construction Environmental Management Plan (CEMP: Biodiversity) has been submitted to and approved in writing by the local planning authority.

The CEMP (Biodiversity) shall include the following:

- a) Summary of potentially damaging activities
- b) Identification of "biodiversity protection zones"
- c) Practical measures (both physical measures and sensitive working practices) to avoid or reduce impacts during construction (these may be provided as a set of method statements)
- d) The location and timing of sensitive works to avoid harm to biodiversity features.
- e) The times during construction when specialist ecologists need to be present on site to oversee works.
- f) Responsible persons and lines of communication.
- g) The role and responsibilities on site of an ecological clerk of works (ECoW) or similarly competent person.
- h) Use of protective fences, exclusion barriers and warning signs.

The approved CEMP: Biodiversity shall be adhered to and implemented throughout the construction period strictly in accordance with the approved details, unless otherwise agreed in writing by the local planning authority.

The CEMP must also include the following specific plans / documents:

- Pollution Prevention Plan for the watercourse (using good practice guidance such as CIRIA C532)

Reason: In the interests of biodiversity and in accordance with LP30 and NPPF15

Lighting strategy

No works are to commence unless a detailed lighting scheme, developed in accordance with established guidance (e.g. Bat Conservation Trust and Institute of Lighting Professionals (2023) Bats and Artificial Lighting at Night), has been drafted and agreed with the council. The Sensitive Lighting Strategy will demonstrate that the proposed lighting will not impact upon ecological networks and/or sensitive features. Thereafter the agreed lighting scheme shall be implemented, subject to any variations approved in writing by the planning authority. All external lighting shall be installed strictly in accordance with the specifications and locations set out within the Lighting Strategy.

Reason: In the interests of biodiversity and in accordance with Policy LP30 and NPPF15

Tree protection

A Hedgerow and Tree Protection Plan detailing measures for the protection of trees and hedgerows during the works will be submitted to and approved by the LPA prior to the commencement of works on site, including site clearance and delivery of materials.

Hedgerow and tree protection measures will include temporary fencing for the protection of hedgerows in accordance with BS 5837:2012 Trees in relation to design, demolition and construction – Recommendations. Any alternative fencing type or position not in accordance with BS 5837:2012 will be agreed in writing by the LPA prior to the start of development.

The root protection fencing will define the works exclusion zone around hedgerows and trees. Activities liable to be harmful to hedgerows and trees are prohibited within this exclusion zone, unless agreed in writing with the LPA. The approved hedgerow and tree protection measures will remain in place until the completion of development or unless otherwise agreed in writing with the LPA.

Reason: In the interests of biodiversity and in accordance with Policy LP30 and NPPF15

Many thanks,
Katie
