I'm the owner of the land at The Eightlands Banquet Hall. We were approached by Jet Network solutions regarding there plans. We were still discussing their proposal but to our surprise, they put in the planning application without our prior permission or knowledge. They have verbally apologised and said that they will rescind the planning application if we're not happy and said it was miscommunication between their different departments.
We object very strongly because:
- We have our storage containers on the site which are essential for our business,and we need easy access to them.
- The area is used for staff and our upstairs flat parking.
-We have a tenanted self contained flat upstairs. They need easy access to the flat for moving in or out. Removal of large furniture etc will be a huge issue.
-The view from the flat window will be very severely affected by the tower.

We feel very upset and angry and feel we have been hoodwinked and this has been done behind our backs. They knew of our serious reservations and they sent us plans which we were still considering and taking advice on when were informed of their planning application. This is our land and I do not want this application to be approved.
Thankyou
