

I object against this for several reasons, first being the traffic caused outside the house causing my drive way to get blocked. Several cars being parked at busy traffic times dropping their children off and causing danger on the road. when pulling out onto a main road and it also being a busy road. In the planning application they have stated that there is 2 cars which is false information there is usually about 10-15 cars parked up with hazards waring lights. When they are hosting events the whole street is full of parked cars in the planning application they have stated that they will be parking on york avenue, this can not be possible as residents already live in york avenue and the street is always full of parked cars. As witnessed they don't already follow these rules so how can you expect them to follow the rules later. They leave there cars on the main road and block of the whole road causing obstruction and they have no consideration about other road users.

They are using the term education centre/meet place for the community which I will NOT be using. They are using this term to hide the fact they are operating a mosque here and teaching young children with no license or licensed staff members. Safeguarding should be taken into consideration as to what they are teaching the children that are currently attending. This is deeply concerning, operating hours are between 5pm-7pm. They should be shut down immediately. There is more to this that meets the eye or that are telling. I don't feel safe with this opening near my property. They should take this somewhere else not near my property or busy road. They should be opening a mosque/meeting hall in a designated area where there is off site parking where drop of and collection isn't a problem. This should not be done in a small terraced house where it's causing havoc and obstruction. This property is too small to host any sort of meeting or running. There can't be mosque classes next to residents who want to live their life in peace and not be disturbance. Would you run a church from your house? Proper routes and channels should be taken when opening a mosque including proper licensing and qualified members.

When they be hoisting events, there is very loud music playing which I can hear from my property. Cars parked outside my house and along the road blocking the foot path I do not in any circumstances feel safe to ask them to move their car. If you look into the "Shia" belief they do self harming which I do not believe in how do I know that the children are safe in the property. This matter needs to be investigated immediately.
