All trees to have clear stems to 1.8m above ground level and 2.0m above ground level for extra heavy standard and semi mature trees with well developed branching heads with a single, central leader and healthy, fibrous root systems. Trees shall be planted into pits of an appropriate size to accommodate the root system without restriction, backfilled with a 3:1 topsoil:compost mix and shall be secured to a machine rounded stake using 1 no. biodegradable tree tie. Finished height of stake shall not exceed 1/3 height of staked tree above ground. Foundation design of new buildings shall accommodate proposed tree planting in accordance with NHBC guidelines.

### HEDGE SCHEDULES

Hedges to be planted into prepared trenches 500mm wide and deep enough to accommodate the root system. Trenches shall be backfilled with a 3:1 mix of topsoil:compost and dressed on completion with a 50mm depth of coarse, amenity bark mulch to approved sample.

#### BEECH HEDGE

Species	Size in cm	Nos Reqd
Fagus sylvatica	60-80	2915

Hedge to be planted as a double staggered row 300mm apart with 200mm between rows (5/linm). Hedge plants to be first class quality with branching stems and a vigorous root system.

#### ESCALLONIA HEDGE

Species	Pot Size	Size in cm	Nos Reqd
Escallonia 'Apple Blossom'	5L	40-60	1302

Hedge to be planted as a single row 300mm apart (3/linm)

#### LAUREL HEDGE

Species	Pot Size	Size in cm	Nos Reqd
Prunus 'Etna'	5L	40-60	456

Hedge to be planted as a single row 300mm apart (3/linm)

### TURFING TO FRONTAGES

The topsoiled area to be turfed, is to be grade and cross-graded to even running falls, to allow the finished levels of the turf to be 40mm above the adjoining paved areas. The surface should be lightly and uniformly firmed by rolling or treading and reduced to a fine tilth up to 25mm in depth. All rubbish, stones greater than 50mm in diameter etc, shall be removed from the surface. Apply an even application of approved fertiliser at a rate of 70g/m<sup>2</sup> and rake in. No turves shall be laid in exceptionally frosty weather or in other unsuitable weather conditions. The turves shall be laid in a stretcher bond pattern, closely butted and firmed into position, to the correct levels. The turves should be laid off planks, working over turves previously laid. A dressing of fine, sifted topsoil (complying with BS 3882) should be applied to the laid turf and brushed well into the joints. Turves shall be watered regularly to prevent them drying out before they establish.

### PLANTING NOTES

All trees to be planted and procured in accordance with BS 8545:2014. The providing nursery shall demonstrate Plant Healthy Certification and/or an adopted biosecurity policy and plant passport scheme. Aftercare shall be in accordance with the approved Landscape Management Document.

#### GROUND PREPARATION

- Where required all existing topsoil and subsoil shall be stripped and stored separately on site. Heaps must not exceed 3m in height and should be used within 12 months in accordance with BS 4425 (Code of practice for general landscape operations).
- Existing topsoil and inert sub soils, shall be analysed in accordance with BS 3882 to determine available nutrients, texture, organic matter content and pH. Where required, existing soils are to be improved in accordance with BS 3882:2015. Subsoils shall conform to BS 8601:2013
- In all instances, where soil is to be retained and relatively undisturbed for the purposes of planting new vegetation on site, then it must be alleviated to avoid compaction, must be tested for pH for specific species suitability, and may require the addition of biochar + compost + organic fertiliser + native soil.
- Imported topsoil and site won soils shall be to British Standards BS 3882 - Multipurpose Grade. Spread to 300mm depth over areas to be planted with trees and shrubs. Remaining minimum rooting depth to be provided by a good quality subsoil to BS 8601:2013, free of building material debris to achieve the following overall rooting depths:
  - Grass - 450mm
  - Shrubs - 600mm
  - Trees - 900mm
