<p>Dear Sir/Madam.</p> <p>We would like to object to the planning application 2025/92995 in relation to its effect on neighbouring properties.</p> <p>The application has mention of 'beehives' almost as a side note but unfortunately, we have experience of these hives over the spring and summer of 2025.</p> <p>Without warning or discussion with neighbours the hives appeared early in the year. Initially there were only a small number but this grew to over 30 hives in subsequent weeks. Because our property is downwind of them, we started to experience bee excrement on washing, cars and windows in early spring. As the number of hives increased this became a deluge making it impossible to hang out washing, or even leave out patio furniture cushions. Our vehicles, one of which is white, were also covered and due to the dry weather were almost impossible to get clean and were stained from the residue. We were constantly having to wash clothes, vehicles and windows to prevent damage from the acidic substance, and use our clothes dryer in summer!</p> <p>We did raise this issue with the owner's mother whilst out walking, but did not make any formal complaint. I would like to stress the amount of faeces was astonishing with droppings covering every square inch of our property.</p> <p>This situation also affected all our neighbours, many of whom are elderly and unable to complain.</p> <p>We object strongly to any hives on that property in the future.</p> <p>Regards,</p>
