<p>Birstall is a small village that is already over-represented by barber shops, take-aways and vape shops and the addition of a similar business as per this application will do nothing for the community of Birstall. The existing barber shops always appear quiet so I don't fully understand the logic of an additional business. I don't wish to dampen anyone's ambition but I can't see this application providing any meaningful improvement or value to the village.</p>
