<p>This application is taking away the listed buildings design changing it from what it was. The current design needs to stay with the shop front in matching with the rest of Birstall and the stained Glass replaced . Signage should be kept to low level lighting and again within the surrounding shops design. I also note the pavement been left unsafe for passing people. Does Birstall really need another barbers also when other ammineties are further required.. I strongly object to this going ahead .</p>
