<p>The actions of the applicant so far (smashing the frontage without regard for health and safety does not encourage confidence in this development.</p> <p>Birstall is supposed to be a conservation area but there is very little cohesiveness in the way recent signage has been installed.</p> <p>The shop in question has been a much loved fixture in Birstall for many years and deserves to have a sympathetic renovation and be an attractive complementary addition to the streetscape, particularly as it is in a prominent position.</p> <p>I believe other businesses have previously been refused permission for shutters. Personally, I think these are a sensible precaution against crime, there needs to be parity for all businesses and perhaps a standard applied to ensure a tidy appearance.</p> <p>I do not think yet another barbers is a useful addition in Birstall.</p>
