<p>Application is to Change the design of a beloved shop front, in a conservation area, after already changing it without planning permission and being forced to revert the changes.</p> <p>Making this change will irreversibly change the look of yet another landmark location within our local area, changing the character of not only this building, but the marketplace as a whole. It is not in keeping with the spirit of the area, and will permanently change the layout and design of a historical shop front.</p> <p>I strongly object to this application, and the impact it will have on the marketplace, and the wider area.</p>
