<p>As part of a conservation area a modern roller shutter would be totaly out of characyer to the village centre. Part renovations to the shop frontage have already destroyed mamy original features before the owners were forced to stop.</p> <p>Also the property is intending on using the premises as abbarbers. The village already has a high numbe of barbers, some of which seem to be used very little, bringing in little trade to the village and community.</p>
