<p>I object to the roller shutter being installed. The properties either side do not appear to have shutters and this would adversely affect the character and appearance of this row of buildings within a conservation area. The premises are directly opposite the market square, the focal point of the village.</p> <p>I also note a Barbers is proposed for this building. Birstall currently has 5 Barber shops within the village centre, with one already opening 7 days per week, and another 3 within a 5min walk from the centre. Birstall is saturated with Barbers, this makes the village unattractive to new investors when there are so many businesses offering the same thing, a lack of retail diversity will deter people from spending money in the area.</p>
