<p>I am a resident living on Aldonley. From our rear patio, we can see the extension directly opposite us. In my (professional) opinion the side elevation has been built too high and should be reduced. Am I right in saying that there was an enforcement notice on the works, that is why a second application has been submitted?</p> <p>The wall (side elevation) is too high. If these works are to proceed, then the height of the side elevation wall should be no higher than the height of the eaves of the existing building (so that the gutter continues all around). In addition, the roof should be hipped to match the existing hip on the existing dwelling.</p>
