

17/12/2025

2025/93151 - Removal of conditions 3, 4, 5, 6, 7, 8, 10, 12, 14, 15 and 21 on previous permission 2021/94337 for erection of construction facility to facilitate the construction works for the section of the TRU between Huddersfield and Westtown (Dewsbury), provision of strategic construction compound including open storage, trackworks and overhead line equipment (OLE) assembly and associated welfare facilities, construction of a retaining wall, environmental mitigation measures (noise attenuation) and provision of temporary platform for use during works at Huddersfield Station with associated access, utilities/drainage works

Operational railway land, Hillhouses Yard, Alder Street, Huddersfield

Dear Liz,

Thank you for your email of the 5th of December 2025 regarding the discharge of Condition 21 at the above site.

WYAAS is unable to support the discharge/ removal of this condition at the present time.

Although the fieldwork has been completed, and no further fieldwork is required WYAAS have not yet received the necessary post-excavation report required to fulfil the condition.

We are awaiting the updated archaeological report from the archaeological consultant. I have contract them but to date have not had any response.

Comments on the draft report were previously issued, but we have not yet received the revised version addressing these points. As such the report has not been uploaded to the Historic Environment Record (HER).

We have also not received confirmation that the site archive has been deposited with the relevant museum or online depository.

Until these outstanding matters are resolved and the final documents approved by WYAAS, the requirements of the condition have not been met.

We therefore recommend that Condition 21 remains in force and is not discharged until the updated report and archive confirmation are submitted.

Kind regards,
David Williams
WYAAS Team Manager
