Dale Street  
Longwood  
Huddersfield  
HD3 4TG

Date: 20-Jan-2026  
Our Ref: 2025/93179

Dear Sir,

**TOWN AND COUNTRY PLANNING ACT 1990  
TOWN AND COUNTRY PLANNING (GENERAL PERMITTED DEVELOPMENT)  
(ENGLAND) ORDER 2015  
APPLICATION NO: 2025/93179  
DEVELOPMENT: PRIOR NOTIFICATION FOR DEMOLITION OF COMMERCIAL  
BUILDING  
CITY ELECTRICAL FACTORS, 1, LEEDS ROAD, HUDDERSFIELD, HD1 6DD**

I refer to your submission of details relative to demolition proposals as described above.

The proposal as described is acceptable and, subject to all works being carried out in accordance with the description contained in the notification, the Council will not require the submission of further details. Prior approval is not, therefore, required and the works described may be carried out.

I would draw your attention to the provisions of Schedule 2, Part 11 of the General Development Order as amended, which requires that any works notified to the Council under these provisions must be carried out within a period of 5 years from the date on which the Local Planning Authority were notified. As such, the development proposed must be completed before 16-Nov-2030. Failing this, if you intend to carry out the works after this date, further notification will be required.

If approval under the Building Acts is required for the development, you should ensure that such approval has been obtained before carrying out any works.

**NOTE:** All works should be timed to occur outside nesting bird season (typically March to August, inclusive). If this is not possible all potential bird nesting opportunities must be checked by a suitably experienced ecologist within 24 hours prior to works. If any active nests are found, the ecologist should advise on suitable species-specific works exclusion zones. The exclusion zones should be regularly monitored by the ecologist and remain in place until the young have fledged the nest, or the nests are otherwise deserted.

**NOTE:** Bats and the places they use for shelter or protection (i.e. roosts) are protected under the Habitats Regulations 2017 (as amended). They receive further legal protection under the Wildlife and Countryside Act 1981 (as amended). Section 43 of the Habitats Regulations makes it an offence to: deliberately capture, injure, or kill a bat; deliberately disturb bats; or damage or destroy a bat roost. Where a licence is required to derogate from the Habitats Regulations, a grant of planning permission does not constitute consent to proceed with the works insofar as they affect the species in question. The licence must be applied for separately from Natural England, be granted and all licence conditions be complied with for the works to proceed lawfully.

**NOTE:** No construction related noise shall be audible beyond the site boundary outside the hours of:

07.30 to 18.30 hours, Mondays to Fridays

08.00 to 13.00 hours, Saturdays

With no construction related noise audible beyond the site boundary on Sundays or Public Holidays.

**NOTE:** Kirklees Council has powers under Section 60 of the Control of Pollution Act 1974 to control noise from construction sites and may serve a notice imposing requirements on the way in which construction works are to be carried out. It has additional powers under Sections 80 of the Environmental Protection Act 1990 to prevent statutory nuisance including noise, dust, smoke and artificial light and must serve an abatement notice when it is satisfied that a statutory nuisance exists or is likely to occur or recur. Failure to comply with a notice served using the above-mentioned legislation would be an offence for which the maximum fine on summary conviction is unlimited.

**Plans and Specifications Schedule:**

| Plan Type        | Reference | Web ID | Date Received |
|------------------|-----------|--------|---------------|
| Location Plan    | -         | -      | 17/11/2025    |
| Block plan       |           |        | 17/11/2025    |
| Application form |           |        | 17/11/2025    |

Pursuant to article 35 (2) of the Town and Country Planning (Development Management Procedure) Order 2015 and guidance in the National Planning Policy Framework, the Local Authority have, where possible, made a preapplication advice service available, complied with the Kirklees Development Management Charter 2024 and otherwise actively engaged with the applicant in dealing with the application.

Further information was sought regarding the methods of demolition and the restoration of the site. The applicant provided the requested details on 15th December 2025.

**Development within a Coal Mining Area**
**DEVELOPMENT HIGH RISK AREA - INFORMATIVE NOTE**

The proposed development lies within an area that has been defined by the Mining Remediation Authority as containing coal mining features at surface or shallow depth. These features may include: mine entries (shafts and adits); shallow coal workings; geological features (fissures and break lines); mine gas and former surface mining sites. Although such features are seldom readily visible, they can often be present and problems can occur, particularly as a result of new development taking place.

Any form of development over or within the influencing distance of a mine entry can be dangerous and raises significant land stability and public safety risks. As a general precautionary principle, the Mining Remediation Authority considers that the building over or within the influencing distance of a mine entry should be avoided. In exceptional circumstance where this is unavoidable, expert advice must be sought to ensure a suitable engineering design which takes account of all relevant safety and environmental risk factors, including mine gas and mine-water. Your attention is drawn to the Mining Remediation Authority Policy in relation to new development and mine entries available at:

[Building on or within the influencing distance of mine entries - GOV.UK](#)

Any intrusive activities which disturb or enter any coal seams, coal mine workings or coal mine entries (shafts and adits) requires a Mining Remediation Authority Permit. Such activities could include site investigation boreholes, excavations for foundations, piling activities, other ground works and any subsequent treatment of coal mine workings and coal mine entries for ground stability purposes. Application forms for Mining Remediation Authority permission and further guidance can be obtained from The Mining Remediation Authority's website at: <http://www.gov.uk/get-a-permit-to-deal-with-a-coal-mine-on-your-property>

[What is a permit and how to get one? - GOV.UK \(www.gov.uk\)](http://www.gov.uk/get-a-permit-to-deal-with-a-coal-mine-on-your-property)

In areas where shallow coal seams are present caution should be taken when carrying out any on site burning or heat focused activities.

If any future development has the potential to encounter coal seams which require excavating, for example excavation of building foundations, service trenches, development platforms, earthworks, non-coal mineral operations, an Incidental Coal Agreement will be required. Further information regarding Incidental Coal Agreements can be found here -

<https://www.gov.uk/government/publications/incidental-coal-agreement/guidance-notes-for-applicants-for-incidental-coal-agreements>

If any coal mining features are unexpectedly encountered during development, this should be reported immediately to the Mining Remediation Authority on 0800 288 4242. Further information is available on the Mining Remediation Authority website at: [Mining Remediation Authority - GOV.UK](http://www.gov.uk/get-a-permit-to-deal-with-a-coal-mine-on-your-property)

An important part of improving our service is to review your feedback on the way that we have dealt with your planning application(s). Please take a couple of minutes to email your comments to [dc.admin@kirklees.gov.uk](mailto:dc.admin@kirklees.gov.uk) so that we can work on continually improving our customer service. Thank you.

Yours faithfully

Mathias Franklin  
Head of Planning and Development
