<p>This application comes after years of trying previously get permission for a business premise on the site, when many local residents warned that this seemed like a first step to establish a new footprint when it was known that the land owners had a future hope to live there. Now, without ever actually building the storage facility and using it as such, they want to change it to a holiday let, thus establishing that the land can be used for a form of housing.</p> <p>What's more and once again, a lot of work has been undertaken already on the site prior to any permission being given.</p> <p>As previously stated in the earlier representations, this development appears to afford the users a direct line of site into the front bedroom and to the bed of 8 Slaithwaite Gate, affecting privacy which cannot be acceptable. It will mean multiple additional vehicular movements on and off of the site.</p> <p>Whilst I understand that speculation about motivation may not be considered, past actions suggest that this is a stepping stone towards further development on a piece raised land that would impact the existing properties on Slaithwaite Gate.</p>
