I live nearby and I object to this application. I have lived here for over 15 years and during that time the building and car park have never been used so late in the evening, as the site was previously an educational facility. The proposal would allow the building and car park to be used late into the evening, which would cause a clear loss of residential amenity. Noise from cars arriving and leaving, engines, doors slamming, people talking and taxis waiting would be very noticeable and disturbing, particularly at night. I also regularly walk along the access lane to the rear of this site. It is steep, narrow and unlit and already feels unsafe after dark. Allowing more vehicles to use it in the evening would make it even more dangerous for pedestrians. Cars reversing, headlights, limited visibility and unfamiliar drivers would significantly increase the risk of accidents. This is a quiet historic area and late-night activity would be out of keeping with the character of the area and harmful to those who live here. For these reasons I ask that this application be refused.
