| <p>This is a quiet residential cul-de-sac and inappropriate for business use. Parking is limited and the continual change over of staff is bound to increase traffic in the road. The road becomes private immediately adjacent to the property in question and there is no public right of way. The grassed area in the centre is privately owned and not available for general access. The use of the property for this purpose is likely to impact the value of the other houses in the road.</p> |                              |
