If planning for 75 houses is granted it will negatively affect the surrounding area. The access around the site is limited for vehicles with one way accesses and single lanes. The impact of the vehicles that come from the residential area is already congested, especially at peak times around school hours. The additional cars from the planned site would cause major traffic build up and congestion, the access being next to a primary school is a major concern and poses risk to families walking safely not only from road traffic accidents, but also the quality of air, impacting on the health of all in the surounding area, especially the young. I also have concerns around emergency vehicle access being impacted due to the extra vehicles.
Doctors and dentists are already struggling with capacity, these houses would add extra stress to these vital services and impact residents health and well being.
It is important for people to have access to green spaces and the loss of this comes at a detriment to all of society. Well being, social behaviour and our natural habitat all pay the price negatively when this is lost.
