<p>I object to planning of 2025/93355. It would be unsafe on Hepworth lane as its one-way and doesn't have a foot path on either side of the road in parts and no way of widening the road. Hepworth lane is a bad junction already. The traffic is so heavy at time I cannot drive out of Grove street on wellhouse lane. Parts of wellhouse lane is so narrow that cars come on to the pavement. A number of times when walking my children to crossley fields school, when they went to that school cars have come on to the pavement and nearly hit us. With more traffic on these narrow roads this is an accident waiting to happen. This development would cause increased noise and disturbance plus the air quality from even more traffic. The current infrastructure of drains in this area would not able to take the added strain. The extra traffic this development would cause would be detrimental to local residents health and well-being. Removing the trees and green fields will reduce natural drainage increase in the risk of flooding to surrounding properties. The access road would cause a very dangerous junction. I don't understand What has changed to the land to make it safe to build on. I don't think the mines have disappeared.</p>
