The traffic problem created by the building of these homes will extend beyond Woodward Court and Hepworth Lane . Flash Lane and Shillbank Lane traffic creates major problems at the Dunbottle Lane and Flash Lane . This in turn creates issues during term time at the junction of Camm Lane and Dunbottle Lane. Hopefully these have already been highlighted. My main objection is that more traffic will try to avoid these bottleneck roads and attempt to use Crossley Lane which is already far too narrow for the traffic that use it. The verges are overgrown , the speed of vehicles may be within the limit but this is not suitable for amount of traffic and pedestrians. Vehicles do not give way for pedestrians. The Bellway homes will.create more traffic and potential injuries to pedestrians. The surrounding roads are definitely not suitable for an additional 150 vehicles whatever time of day, month or year a survey is done
