Subject: Fw: Reference: Planning Application 2025/93355 (Land off Woodward Court)

Dear sirs

I am writing in relation to the above planning application to strongly oppose the works. The updated application in relation to traffic management on Woodward Court, Wellhouse Lane, and Hepworth Lane fail to address capacity or road safety.

The measures, including single yellow lines, raised speed table and making Hepworth Lane an exit only point do nothing to manage the volume of traffic nor contribute to the safety of people given the times where there are issues are at school drop off/pick up and rush hour where traffic is at its worst and moving at its slowest.

Hepworth Lane has already been identified as unsuitable for traffic intensification due to the narrow nature of the road and the amount of traffic using it already. These plans do nothing to improve safety and are potentially dangerous.

While these traffic-calming measures might look feasible on paper, they do not reflect our lived experience on these roads. They exist solely to facilitate the developer, failing to address overall traffic volume or resident safety. Furthermore, local residents have not been properly consulted on these schemes.

I also wish to convey my heartfelt opposition to these plans for the destruction of green space around our town which needs to be protected at all costs to provide safe places for wildlife to live.
