Subject: Planning application 2025/93355 Land off Woodward Court , Mirfield .

It has been brought to my attention that Bellway Homes are proposing to introduce parking restrictions & traffic calming devices around the junction between Wellhouse Lane & Woodward Court.
It is my opinion that these proposals are ridiculous as they do not address the overwhelming issue which is the insurmountable lack of capacity & very poor sight lines at junctions, of ALL the roads which would be used to access the site.
Why should existing residents have to put up with speeds humps etc. causing extra wear & tear on their vehicles to facilitate this totally ill conceived development on land totally unsuitable for housing due to the already well known issues on the surrounding roads.
I would hope that finally after all these years Kirklees planning department will put a PERMAMENT stop to this land being used for building .
The very fact that Bellway are making these proposals confirms that even they realise the unsuitability of the existing roads network to access the site.
Yours in anticipation of the correct outcome
