I'm writing this email on behalf of the surrounding area. The area you're wanting to build on is a beautiful and peaceful place for all the animals especially the horses that class that as there home! You have to imagine if some came into your safe space and wanted to knock it to the ground then been in a position where you have lost everything! There's so much wildlife there that not everybody see as they don't take time to take appreciate the natural beauty. They forget about the bigger picture.... NATURE as it's getting taken away one tree at a time.

This is a very peaceful street and that's all down to the land you're wanting to take away that's left on our street. I can't imagine how noise pollution the animals and people with have to go through if this actually goes ahead. This is already a very tight 1 way street where the community already struggle to navigate it especially when you have to be careful when driving down Hepworth lane as there are a lot of elderly people and dogs that deserve peace that's why they are happy living here! Also the amount of stress and discomfort this will course to the OAP members of the public it's fair at all. This is their forever home and the place they have chosen to finally relax.

I have only just been made aware of this situation as I've been out of the country for some time. The people of Hepworth lane aren't upto date with technology they are busy trying to live and be happy. So it's my duty as member of the mirfield community to put my foot down and stand up for what's right and try put some good back into the world.

The government make it difficult for people to appeal. Especially in times like theses where all people can think about is how will they afford to live, buy food and water along with all the bills the country throws at them!

So it would mean a great deal with you would take the time to read this email with an open heart and consider emailing me back so we can talk and come to a solution. I hope you understand my concerns and understand I'm only looking out for the people, animals and nature, I just want everyone to be happy but nature comes first along with the animals that bring us peace.

Thanks for taking the time to read my email I look forward to hearing from you.
