Subject: Planning application 2025/93355 land off Woodward Court

Good afternoon,

I would like to raise my main concern regarding the above planning application.

- Access onto Hepworth Lane from the proposed new development is not considering the amount of pedestrian traffic (particularly during school term time) moving through Hepworth Lane from the junction of Shillbank Lane and Flash Lane. What must be realised for the safety of all, is that the amount of existing traffic using Hepworth Lane is not conducive with protecting pedestrians on a road that has no footpath. God forbid a fatal accident should occur due to increase in traffic flow, should this happen those members of the planning committee who passed this application will have a lot to answer for.

Regards,
