Appendix A – Climate Change Statement

Climate Change Statement for Planning Applications

Part 1: Applicant details

Name of applicant/agent	Agent - Mrs Joanne Harrison
Site Address	The Old Sty Oldfield Road Honley HD9 6RN
Description of Development	Proposed agricultural building to house livestock

Part 2: Climate Change Mitigation measures

Please respond to the following questions considering the measures set out in the Climate Change Guidance note:
Q1: What measures have been/will be taken to reduce the energy demand associated with your proposed development beyond the minimum required in Building Regulations? (See section 2)
Minimal energy requirements are needed for this building, due to its design and use to house livestock.
Q2: What measures have been/will be taken to limit the carbon consumed through the implementation and construction processes, e.g. by reusing existing on-site materials or sourcing materials locally? (See section 3)
Materials where possible will be sourced/manufactured locally and timber will be sustainably sourced.
Q3: What measures have been/will be taken to utilise renewable or low carbon energy sources? (See section 4)

There are no long term energy requirements for the building, no heating is required.
Q4: What measures have been/will be taken to ensure the building design and layout has been optimised to energy efficiency beyond the minimum requirements in Part L of the Building Regulations ? (See section 5)
Not applicable for the proposed building.
Q5: What measures have been/will be taken to reduce potential impacts of flooding associated with your proposed development? (See section 6)
None specifically, however, the design of the building would allow it to flood if necessary and rainwater from the roof area will be harvested for drinking water for the livestock
Q6: What measures have been/will be taken to reduce water stress associated with your proposed development? (e.g. Water retention and minimisation measures) (See sections 7 and 8)
As above, the rainwater will be harvested for use on the holding
Q7: What measures have been/will be taken to provide biodiversity net gains? (See section 8)
Information regarding this has been provided with the application.
Q8: What measures have been/will be taken to reduce air pollution associated with your proposed development? (See section 9)
Minimal air pollution is associated with the building and the livestock within it and will have little impact when the holding is taken as a whole.
