There is no indication on the proposed use of this building above a vague ‘agricultural use’. It is very close to residence and any industrial use will have a severe impact with noise odours and potentially dust. Local residence must understand the intended use of this building particularly since it is so large. Given the massive size, what are the restrictions on times of use. If this turns into a warehouse to service of the locations, then why is it being built on Greenbelt? The visual impact will completely change the landscape looking both down and up the valley. There are too many unanswered questions and a proper consultation with local residents is needed to understand intended full use and any guarantees will be enforced by Kirklees on its usage.
