Our home overlooks the lorry turning yard at the rear of the mill. The trees on the Spinksmire Mill estate adjoining this yard and north side of the mill have been progressively been cut down and thinned out over the last four and a half years. The map in the planning application is no longer an accurate representation of what is on the ground. The previous planning permission for building work at Spinksmire Mill required retention of trees some of which have progressively disappeared. We would respectfully ask for reinstatement of trees and improved screening as a requirement of any approval and effective policing of this requirement by Kirklees. I can provide dated photographs of the progressive tree loss since December 2021
