

**Consultation Response from Alan Smith,
KC Waste Strategy (Refuse & Recycling)**

2025/93470 Castle Hall, Lee Road, Ravensthorpe, Dewsbury, WF13 3BE

Change of use of existing care home (Use Class C2) to 11 self-contained residential flats (Use Class C3), including internal alterations

Date Responded: 11/02/2026

Responding Officer: Alan Smith

Responding Ref: WPN 25 052

1. Introduction

This response is provided by the Waste Collection Authority (WCA) and outlines operational requirements for waste storage and collection. These comments aim to support compliance with Kirklees Local Plan policies LP24 (d.vi), LP43, the Waste Management Design Guide and the Highway Design Guide SPD. The aim is to achieve a safe and efficient waste collection service.

Section 45(1)(a) of the Environmental Protection Act 1990 places a duty on the Waste Collection Authority (WCA) to arrange for the collection of household waste within its area. Regardless of whether a private contractor is engaged, the WCA must ensure that there is adequate on-site waste storage capacity, suitable access for collection vehicles, and that, should the responsibility for collection revert to the WCA in the future, the process can be carried out efficiently.

The Council takes the issue of bin blight seriously and encourages developers to ensure that the street scene for new developments is not spoilt by the poor design for refuse storage and collection.

The property has 11 dwellings which means that the development will need to accommodate 11 x 180 L of waste per week = 1,980 L. Therefore, the bin store will need room to house 6 x 1,100 L bins.

2. Waste Storage Requirements

The property must accommodate:

- **6 x 1,100 L wheeled bins for:**
 - Residual waste – collected on alternative weeks
 - Recyclable waste – collected on alternative weeks
 - Garden waste – paid for service collected fortnightly (or future Simpler Recycling legislation provision)
- **Bin space dimensions:**
 - floor space required is 990 mm x 1375 mm per bin
- **Bin storage location:**
 - Must not obstruct highways or driveways
 - Be in rear gardens, gated access must be secure and wide enough for bins to pass through
 - No gradients steeper than 1:12 or steps
 - Must not be obstructed by parked cars
- **Composting:**
 - As the properties have a garden the developer is encouraged to provide compost bins to help better meet the council's 'clean and green' objectives for waste reduction

3. Bin Collection Points (BCPs)

- Must be shown on a layout plan for all properties
- No gradients steeper than 1:12 or steps from storage area to BCP
- Located adjacent to an adoptable highway
- Solid surface required, resistant to constant wear and tear
- The maximum drag out distance from bin storage area to BCP is 25m (BS5906:2005)

- Temporary BCPs may be needed for early occupiers whilst site is being built (likely collection area would be adjacent to Lee Road)
- Access to the bin store must not be blocked with parked cars, details of how cars will be stopped from parking in front of the bin store is required

4. Refuse Collection Vehicle (RCV) Access

- The WCA will not enter:
 - Private drives
 - Roads not built to an adoptable standard
 - Active construction sites
- Road layout must:
 - Enable looped access (preferred over cul-de-sacs)
 - Where applicable, turning heads must be suitable for an 11.85m RCV
 - Turning areas must be made active to avoid them being used for additional parking
- Reversing distance for an RCV must not exceed 12m (WISH guidance)

5. Phased Development Considerations

For phased occupation:

- Temporary waste storage and collection arrangements must be approved prior to first occupation
- WCA will not collect from incomplete sites
- Developers must bulk order bins for residents via: trade.waste@kirklees.gov.uk

6. Requested Planning Conditions

- **Pre-Occupation Waste Strategy**
Prior to commencement the developer must submit for approval details for bin storage, screening, BCPs, RCV access and how cars will be stopped from parking in front of the bin store. The approved details shall be provided before first occupation and shall be so retained thereafter.
- **Bin Store maintenance**
Before development commences, details of the management and maintenance of communal refuse storage areas by a designated private management company shall be submitted to and approved by the Local Planning Authority. The approved details shall be provided before first occupation and shall be so retained thereafter.

7. Policy Context

- **LP24 (d.vi)**: Requires unobtrusive, well-designed waste facilities
- **LP43**: Supports waste minimisation and recovery
- **National Planning Policy for Waste (5.8)**: Adequate storage facilities at residential premises
