Site Waste Management Plan

Site: Land off Parkwood Road, Longwood, Huddersfield

In response to pre-application comments from the Kirklees Council Waste Strategy Team, the following can be confirmed:

- All properties will provide space for storing 3 x 240 litre bins securely within rear garden areas. These are denoted on the proposed site plan (see Figure 1 for an example);
- All properties will provide a refuse collection point adjacent to the estate road. These are denoted on proposed site plan (see Figure 2 overleaf for an example);
    - This includes those served by a private drive (nos. 6 – 8, 11 – 13, and 16 – 19), thus ensuring a Kirklees Council refuse vehicle does not have to access a private drive;
- A refuse vehicle would be able to service the refuse collection areas and enter and leave the site in a forward gear, as demonstrated by the submitted tracking details (see Figure 3 overleaf); and
- The turning head that would be used for the refuse vehicle to turnaround leads to a double garage and driveway that serves a single plot (no. 15). This arrangement would naturally discourage indiscriminate parking in the turning head by other residents, as such would block the residents of plot 15 in, whilst the likelihood of the residents of plot 15 parking in the turning head is limited, as they would have space for 4no. vehicles off carriageway.
