

I wish to formally state that I do not agree with, nor consent to, any of the proposed works and I strongly object to any build activity commencing in the area.

The development would significantly increase traffic from Thorpe Green Drive onto Weavers Lane. Thorpe Green Drive has only recently been resurfaced, and the daily movement of heavy machinery would not only damage the road but also generate considerable noise pollution and general environmental pollution due to high vehicle activity.

The proposed site appears to encroach on Greenspace currently maintained by the residents of Weavers Chase. As residents fund this maintenance, clarity is required on whether this has been considered and whether compensation or reimbursement would be provided.

The project is expected to run for an extended period and would cause prolonged disruption, particularly for those who work from home, due to continuous noise and heavy vehicle presence.

There are also serious concerns regarding safety at the entrance to the development, as children regularly play throughout the surrounding streets.

The land earmarked for construction currently supports a variety of wildlife, which would be adversely affected by the works.

Additionally, the new housing would directly overlook the existing properties at the bottom of Weavers Lane, impacting privacy and altering the established environment.

There is further concern that the development may negatively affect the local housing market and property values.

Overall, I do not believe that the residents of Weavers Chase have been adequately informed or given sufficient opportunity to review and challenge the proposal. As such, I object to the development in its entirety.
