<p>I am objecting in terms of the impact on highway safety and traffic, specifically in relation to traffic on Weavers Lane which is likely to be used as an access point for this development.</p> <p>There are many families with young children that live on this road, there are not proper pavements, and this new development will significantly increase the amount of traffic on Weavers Lane, given that the majority if not all, of each property on the proposed development will have two parking spaces for vehicles.</p> <p>This therefore poses a significant risk to those families living on Weavers Lane. As part of the project, the developer should be obliged as a condition of planning being granted to install speed bumps on weavers land to control the speed of traffic, once the development is completed.</p> <p>Additionally, in terms of conservation of buildings and conservation of the natural environment, and effect on trees and the landscape, there are several species of wild animal that live in the area of the proposed development and use the land which would be negatively affected by this development, damaging the natural environment, and the enjoyment of the natural environment for the current residents.</p>
