<p>The applicant has been operating a beauty salon at this address since returning to the property after renovation. Their clients always park on the road, and either park on the pavement blocking access to those walking past, or on the road close to the Stonefield Road turning, restricting the views of drivers passing by on either road. The further problem is they have a gate and driveway gate that both open out across the pavement, and the client when entering or leaving the premises tend to leave the gate open and again block the pavement (i can provide a photo if required to show the situation). Pedestrians end up walking down the middle of the road, with care, and have to watch to be sure no car comes along Stonefield Road to turn. Currently if clients were made to park on the drive way one of the drive way gates would be opened over the pavement blocking public access.</p> <p>I am not against the operation of a beauty salon on this site, but the gates need to be altered so they swing inward to the property to ensure they never block the pavement. Clients would then always need to park on the drive, and if this were not adhered to, the licence revoked.</p> <p>Please note this area - both Stonefield Road and Gramfield up to the "cul de sac" have many pedestrians using the pavements to visit friends and family in the neighbourhood, as well as dog walkers heading up to the quarry. Further, there are children who walk to/from school and play out, bikes and scooter riding is popular. It is for the safety of these people that we must ensure both the pavement access and a clear view of vehicles at the junction of Stonefield Road is maintained.</p>
