We would like to express our support for the revised proposals for the former Clough Mill site. We have lived in the Colne Valley for around 20 years and would very much like to remain in the area as we approach retirement. We particularly welcome the redevelopment of this former industrial site to provide good-quality, modern and energy-efficient homes within Slaithwaite and close to the village and its existing facilities. We also welcome the mix of different types of accommodation proposed. We think that providing both houses and apartments makes the development suitable for people at different stages of life and with different housing needs. This is particularly relevant to our own circumstances. We have elderly parents who are considering moving closer to us and need accommodation that is accessible and suitable for later life, ideally without stairs. The combination of houses and apartments within the same development offers the possibility for different generations of a family to live independently while remaining close enough to provide day-to-day support. As we approach retirement ourselves, we can also see the considerable attraction of being able to move from an older property into a modern, energy-efficient home that should require less ongoing maintenance. We believe there will be other people within the Colne Valley in similar circumstances who want to remain in the area but whose housing needs change as they get older. For these reasons, we believe the proposed development would make a positive contribution to the range and quality of housing available locally, including providing housing options for people at different stages of life, and we would like to register our support for the application.
