conservation of buildings and conservation of the natural environment - slaithwaite is in a conservation area and this development would be immediately next to it, this would be an eye sore and in my opinion the conservation area should be surrounded by the same character, it is a historic Yorkshire town with buildings of history and stone and this development would not suit the character. impact on highway safety and traffic - the Clough road is already a very poor road layout and was not designed even to allow the traffic through it today let alone with another 30 dwellings worth of people here. Many times cars get stuck and causes considerable delays. The access through slaithwaite town centre itself is also severely impacted, there is already heavy traffic without the extra dwellings. The road through the town does not accommodate this much traffic. There is also insufficient parking around Clough road and through slaithwaite centre itself, the local amenities such as supermarket Aldi does not have enough parking space for the current local residents, and people are also using Aldi to park to explore the town due to no sufficient parking facilities. The local train services will also be impacted and should be consulted, the commuter trains are already over subscribed and the trains cannot accommodate any more people at peak times, there should be bigger trains to allow for any more residents. There are nowhere near enough trees on the proposal, it is in a very green area and the plan should aim to blend in with the current green area with more trees.
