<p>This will be a tragic and avoidable loss of a green field natural space. The site abuts an ancient woodland amenity which will suffer both from a flora and fauna perspective. I am also concerned about sewage pollution into the nearby water course. The site will add further problems to an already poor water utility situation - both in terms of supply pressure and drainage. Many of the potential residents will use cars and the current junction issues at the nearby Sovereign crossroads will be exacerbated. Other infrastructure matters such as lack of medical, schooling and public transport availability must also be considered in respect of any S106 condition agreements. As far as I am aware this site is not yet in any local plan therefore I fail to see why opportunistic applications of this type are in consideration at this time.</p>
