I am concerned that the proposed housing will cause traffic problems on the A635 at the sovereign junction and at Carr Hill Road already a rat run. The green belt should remain green as cumberworth is a small village with ancient woodland. The drainage and sewers are already overloaded as recent events proved.the increase in population will put more pressure on already limited parking facilities in the village. Access in and out to the tip will also be affected by an increase in traffic on the A635.
