

About the application

Application number: 2025/93572	
What is the application for?:	Outline application with all matters reserved, bar vehicle access into the site,
Address of the site or building:	Land South of, Barnsley Road, Upper Cumberworth, Huddersfield, HD8 8NN
Postcode:	

User comments

Type of comment: An objection	
Do you wish your comments to be published on the website anonymously?	Yes
<p>I strongly oppose to this application. The field in question is designated green belt and is the perfect example of why such designation's exist.</p> <p>In depth evaluations are taking place but this objection serves to summarise the obvious drainage issues that have been overlooked.</p> <p>The proposal to divert the combined sewer, which serves much more than Park Lane contrary to the FRA, to a pumping station is shocking. This sewer is already under capacity such that it was surcharging foul drainage from a manhole last week. Why would they propose to rely on a pump? This will likely fail resulting in more pollution into Ancient Woodland.</p> <p>The culverted ditch in the low point of the site has been ignored, local knowledge/historical maps and common sense have been overlooked or ignored. An easement should be provided yet the proposals due not reflect its existence.</p> <p>A new connection via the ancient woodland as suggested would not be possible due to RPAs.</p> <p>Any change to the hydrology of this land which feeds multiple springs into ancient woodland will impact the trees, these springs run even when the beck has dried up. Park lane drainage has not been considered, the gulleys feed into a pipe which has been suggested flows across the application site, this needs proving and protecting. Currently the proposals don't satisfy policy.</p>
