<p>I object to the above planning application on the grounds that it is green belt land which by definition is protected countryside and this land lies in proximity to an ancient woodland, which by definition is an irreplaceable, complex ecosystem. The granting of this application will cause severe and potentially irreversible damage to the ecology of the area. This is a small village that would be unable to cope with the extra housing planned and the subsequent strain on it. The construction process itself would cause air, water and noise pollution and once built it would massively impact already failing public services such as drainage/sewage, increase traffic congestion and the village would lose its identity.</p>
